

# ParkWatch® - Traffic Technologies

## Manage your Car Park Remotely

### FLEXIBLE

ParkWatch® is an IP based technology. The ParkWatch® system can be deployed remotely on a LAN or a WIFI network. ParkWatch® can even operate stand alone from a solar cell/wind turbine combination.

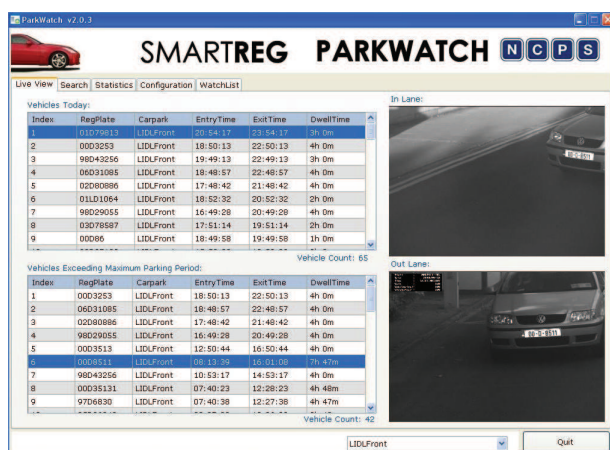

### CUSTOMIZABLE

Time limit zones and revenue rates can automatically be set from one custom interface. From one location you can control all zones across all or one of your facilities. Have daily, weekly or monthly summary reports emailed to your inbox or Head Office.

### MODULAR

You choose which modules you need - advanced analysis reports, extra parking zones etc.

ParkWatch® is completely scalable.

The screenshot shows the SMARTREG PARKWATCH software interface. It features a menu bar with options like 'Live View', 'Search', 'Statistics', 'Configuration', and 'WatchList'. Below the menu, there are two main sections: 'Vehicles Today' and 'Vehicles Exceeding Maximum Parking Period'. Each section contains a table with columns for Index, RegPlate, Carpark, EntryTime, ExitTime, and DwellTime. To the right of the tables, there are two camera feeds labeled 'In Lane' and 'Out Lane' showing vehicles in motion. At the bottom, there are buttons for 'LIDLFront' and 'Quit'.

Index	RegPlate	Carpark	EntryTime	ExitTime	DwellTime
1	01032031	LIDLFront	18:50:13	22:50:13	4h 0m
2	0003253	LIDLFront	19:49:13	22:49:13	3h 0m
3	98042256	LIDLFront	18:48:57	22:48:57	4h 0m
4	06031085	LIDLFront	17:48:42	21:48:42	4h 0m
5	02080886	LIDLFront	18:52:32	20:52:32	2h 0m
6	0101094	LIDLFront	18:49:28	20:49:28	4h 0m
7	98020055	LIDLFront	17:51:14	19:51:14	2h 0m
8	03078687	LIDLFront	18:49:58	19:49:58	1h 0m
9	00086	LIDLFront			

Index	RegPlate	Carpark	EntryTime	ExitTime	DwellTime

- Is your valuable parking space being abused?
- Are you maximising parking efficiency?
- Is your staff parking segregated from your shoppers parking?
- Are you suffering from revenue leakage?
- How efficient are your staff in policing parking usage and tracking vehicles of interest?

Parking & Traffic Technologies ParkWatch® system provides a flexible, scalable and robust Intelligent traffic monitoring system.

ParkWatch® can act as a virtual parking enforcement attendant.

ParkWatch® is very simple to deploy, using a range of SmartReg® IP ANPR cameras. The data gathered from these cameras is stored in a data repository which supports a wide range of reports.

Period Based reports show parking usage over weekly, monthly or annual timelines making it straightforward to identify traffic trends, verify revenue income and highlights those drivers that constantly violate company policy with respect to overstaying time limits etc. In addition, these reports can be automatically generated on a daily or weekly basis.
